DSPL7

DSPL7 has a number of resources suitable for pupils with ASD, ADHD and sensory needs, which can be borrowed by schools for up to half a term. This allows schools to trial these larger, more expensive items to see if they have a positive impact on the pupil.

Sensory resource boxes (x6)

Contents include:
 Ear defenders, ear plugs, liquid and digital timers, carpet spot, assorted fiddle toys, theraputty, calming down strategy cards, emotions fans, talking tins.

Weighted blankets, lap-pads and vests

Recommended by Occupational Therapists for use in the classroom to increase attention span and reduce hyperactivity often seen in children with autism, ADHD, sensory and learning difficulties.

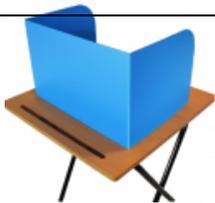

Move 'n sit cushions (x6)

An air-filled seat wedge that is similar to sitting on a Gym Ball (or balloon). The wedge shape and unevenness of the cushion adds an element of instability. It is designed to promote active sitting.

***NEW* Body Socks**

For sensory processing, Autism, ADHD, gross motor and Sensory Diet. 4 way stretchy lycra bodysock. an allround movement, proprioceptive, tactile & deep pressure experience. Once inside the stretchy lycra material gently resists your movements.

Pop up desk screens

This lightweight screen can be placed between pupils to encourage independent working and to act as a privacy partition. Ideal for children with concentration problems who need a distraction free area.

Ball Chair (x3)

Small chair aged 4-8; large chair 9-adult
 Sitting on a stability ball supports and builds core muscles and helps children focus by expending the excess energy they build up.

Squeeze machine (x2)

Providing all over deep pressure as the user rolls between the soft, squishy bumpers, the Squeeze Machine can be an invaluable sensory toy for children that need deep proprioceptive input.

IKEA Hooded swivel chair (x4)

Fits an average sized primary school child

Children's Therapy Body Exercise Ball

The therapy exercise ball is a great way to help with:

- Balancing exercises and skills
- Co-ordination skills
- Increased flexibility

Balls should only be used if recommended by an OT and if a programme of exercise has been provided. Peanut ball also available

***New* Under the desk pedals (x3)**

Noiseless pedals designed to fit under the desk, offers students with ADHD an opportunity to move and exercise during the day, which helps focus and concentration.
